I am Pegasus

... according to legend,
winged and with blazing hoofs,
mane flying, crossed the heavens with such speed I caused the
crash of lightning and the roar of thunder.

Of course, this is a myth, but what an exciting thought—to
race across the heavens with the speed legend gave me.
Naturally it's really impossible for me to have accomplished
such a feat but not for you ... a radio amateur.

You can reach the corners of the world ... with a turn of a
knob you can cross the heavens—the whole world is yours
... adventure is yours.

We have much in common—my legend of adventure—your
history of adventure, as part of amateur radio.

We join our past, present and future here, in this emblem.

A brand new, modern design, emblem for radio amateurs to display
their own call letters. A truly beautiful emblem you will be proud
to wear.

Each piece will be engraved with your call letters—to make it your very
own. The quality and workmanship is guaranteed.

Make your selection now—and wear your emblem proudly—you've
earned it.

33⅓% HIGHER POWER INPUT —with this new beam power tube

If you are now using a 6146, 6146A, or 8298 in class AB₂, B, or C—you can replace it with a new RCA-6146B/8298A and increase your power input in these services by one-third. A single tube takes up to 120 watts plate input, ICAS; *two take nearly a quarter kilowatt!*

What must you do? You simply pull out the old tube. Plug in a 6146B/8298A. Increase screen voltage slightly. Then load up. All you need then is the extra reserve in your power supply.

And there is more about this tube than just high power. "Dark-Heater" design lengthens heater life—makes it possible for the tube to deliver full power output over wide swings in heater-supply voltage. Plate dissipation rating exceeds any design in the 6146 family. And when this new tube operates at 6146 plate input, life expectancy goes up substantially.

Install RCA-6146B/8298A's. Increasing your power was never easier.

Available from your Authorized RCA Industrial Tube Distributor.
